**Presenter:**

[Thanh-Mai Vo, M.D.](#), Saint Louis University,  
Department of Internal Medicine, [Division of  
Nephrology](#)

**Learning Objectives: After completing  
this seminar, participants will:**

- know the incidence and prevalence of End Stage Renal Disease (ESRD),
- understand the typical prognosis of the patient with ESRD,
- obtain the perspective of patients living with ESRD,
- understand the role of shared decision making in ESRD,
- be able to manage the patient with ESRD who decides to forego dialysis.

*This conference brings together palliative and end-of-life care professionals, educators, students, members of professional organizations and individuals interested in improving end-of-life care.*

**What to Wear** Business casual attire is recommended for the event. Since meeting room temperatures are difficult to regulate to everyone's satisfactions, layered clothing is suggested. The rooms tend to run cool so feel free to wear a warm cover-up during the session.

**Photographs** From time to time, Gateway End-of-Life Coalition will use photographs of participants in our promotional materials. By virtue of your attendance, you agree to the use of your photograph in any Gateway End-of-Life Coalition materials, whether print or online.

**Garden View Care Center at Dougherty Ferry** is locally owned and opened in southwest St. Louis County in 1999. The 120 bed care center has become the first choice for many who seek assisted living, skilled nursing, rehabilitation, respite care or dementia care. We offer resident-centered care in an attractive setting. Long term employees like what they do & provide excellent care and service. Our activities based memory care program profoundly improves the lives of residents who suffer from Alzheimer's and other forms of dementia. We are fully certified through the Alzheimer's Association of St. Louis to train people who care for Alzheimer's patients.
